The Company

Talleen is a Bangalore based “you” oriented enterprise committed to providing IT solutions & consulting services to its clients. True to our name we are always engrossed with passion in creating new dimension to customer satisfaction by offering more than what is expected from us. We always focus on nurturing long term relationship with our client’s.

We at **Talleen** are dedicated to providing technology solutions for the ever-growing business community. Our company's goal is to provide affordable, robust, scaleable software solutions to small & medium size business segments to help them leverage the growth & increase the productivity of there organization.

Our state-of-the-art design and heuristics approach have allowed us to produce software that operates efficiently within a very small footprint while emphasizing performance, productivity, and user-friendliness.

Our motivation to build and maintain long-term partnerships enables our clients to benefit from our knowledge, quality culture and consistent drive for innovation. For you this means more time and freedom for developing your company's products and to focus on your next great idea. That's the **Talleen** difference.

Simplifying technology.....
Fostering ideas....

Our Core Values

Talleen operates according to the following core values :

C o m p a s s i o n :

Compassion comes first in all that we do; compassion for the customers we serve, compassion for the society and compassion for our fellow workers.

S e r v i c e :

We are customer-driven. We go to extremes to improve quality of care through exceptional service. We know when and how to exceed our customer's expectation.

R e s o u r c e f u l n e s s :

We encourage innovation and individual initiatives accepting that changes must occur in order to maximize available resources.

I n t e g r i t y :

We realize that profits are important, but we also believe that integrity comes before profit and all business decisions should be based upon this conviction.

C o m m i t m e n t :

We collectively share an unusual commitment to excellence. Our expectation is to be the best we can be in all endeavors through persistence and continuing improvement of skills and efficiencies.

Focused on innovation.....

Engrossed with passion....

The Work

Talleen's categorizes its service offerings into three different line of businesses namely software solutions, E-business solutions and Staffing & consulting services. Have a detailed insight into each one of them in coming pages

Software Solution

Talleen empowers it clients with competent software development process expertise and an unparalleled commitment to delivering quality software on time and within budget. Utilizing the latest technologies and building on the ability to understand the domain, our team is the right choice to mitigate the risk inherent in any major software solution. Give us a call today and we can show you how your can dramatically decrease your overall cost and increase your productivity.

E-Business Solution

Talleen offers innovative e-business solutions which can help you expand your customer base and profits thereby leveraging your companies overall growth . We harness the power of the Internet to build your business and create a profitable distribution channel for your product & services. Our strength lies in understanding the complexity of your business and providing you with a robust & scaleable web based business solution.

Staffing & Consulting Services

Talleen with its service partner, Genesys Global Services Inc., a U.S based company provides IT consulting services to our U.S based clients. Apart from that, Genesys with its powerful processing support from **Talleen** serves clients across the globe especially in U.S ,U.K, Canada and other A.P.E.C regions. The core strength of our services is that we engage state of the art software solutions for the complete recruitment & hiring process for our valued clients.

Software Solutions

Talleen's software development services helps in meeting our clients' business strategies when packaged software does not adequately address their needs. As with all of our IT services, application development is delivered within the context of a total Plan-Build-Manage (P-B-M) solution - an approach that appreciates the dynamics of our clients' strategies and helps ensure predictable returns on investment (ROI).

P L A N

Talleen provides the expertise in industry dynamics, process management, and application and architecture design to recommend technology solution that will meet our clients business objectives and criteria for success.

B U I L D

We provide the design and implementation services to deliver a rapidly developed, scalable and flexible architecture that is aligned with our clients business objectives. People, process and technology issues are fully addressed to ensure a successful implementation.

M A N A G E

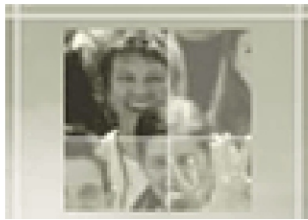

All custom applications are developed with post-implementation issues in mind. That is, the new architecture is based on strict quality standards to enable cost-effective operations. We can provide post-implementation management of custom applications to ensure today's solution evolves with our clients emerging business needs.

e-Business Solutions

Online trade can be very rewarding and can add additional high value service for businesses which have always traded in a traditional way. E-commerce enhances your service and can give your clients a number of benefits especially speed, convenience and availability of your products and services whenever they want. The web is about communicating. Your business needs to communicate with it's customers and suppliers. **Talleen** can provide you with web solutions and services that can help you do that more effectively. We offer a wide range of e-Business solutions covering a spectrum of industrial requirements. Our customizable solution range will help you have your e-business solution up and running in no time. Outsourcing Services

Business Process Outsourcing is one of the most important activities for business to be competitive in working environment with cost reduction in non core activities of the business. Cost reduction and performance have been major issues for business to be ahead in the competitive work environment.

Competitive pressures have forced enterprises to abandon their myopic view of doing everything themselves rather than focus on their competitive advantage. As a result, Enterprises increasingly recognize that the external market offers resources and services that cannot be fostered internally. The new mantra is to do what you do best and leave the rest to your business outsourcing partners. Our services in outsourcing space are :

Process & Quality @ Talleen

Talleen follows the International Standards, which describe fundamentals of quality management systems.

Quality Management Systems adherence and practice within **Talleen**, is driven by the following objectives:

Seek confidence from customers, partners and associates, that their product / services requirements will be satisfied.

Guide the organization internally in achieving the highest levels of productivity and quality.

Achieve an International Project Process systems that confirms to the requirements of auditors, regulators, certification/registration bodies.

We understand customer needs and expectations are changing, and also because of competitive pressures and technical advances, the project deployment at **Talleen** is driven to improve continually.

The Quality Management System approach has encouraged the entire team at **Talleen** to analyze customer requirements, define the processes that contribute to the achievement of a product, which is acceptable to the customer, and keep these processes under control.

With the Quality Management Systems driving the project process and organization systems, we are well on our way to work towards a World-Class organization.
